At 17:55 for 18:00 hours (duration approximately 1 hour) UK Time

This presentation gives a summary of the installation operation whilst detailing the key engineering challenges experienced for the installation of the substructures for the Seagreen offshore windfarm WTGs (Wind Turbine Generators).

The installation of 114 Suction Caisson Jackets is currently ongoing with the Saipem 7000 heavy lift vessel utilising Saipem's vast installation experience. Now with the first installation campaign complete, this gives an opportunity to reflect and share the experience so far.
