Webinar Title:

Shipping in Post-COVID-19 Era

Date / Time:

30 August 2022, Tuesday / 18:30 - 19:30 HKT

Programme Highlight:

The speaker will present the likely situation in shipping in post COVID era. Shipping is important for global trade and the world will recover from COVID with the help of shipping. Shipping is going through various transformation including carbon reduction, digitalisation, remote operations, inspections, audits etc. Shipping is also an important part of global supply chain.

The speaker will touch future economy, business transformation, safety awareness and various pros and cons. This insightful presentation will help professionals to be prepared for the future.
