"DATA DRIVEN ASSET COMPLIANCE AND INTEGRITY MANAGEMENT"

BY

**MARK TIPPING, CENG, MIMAREST, MIMECHE
MANAGER, OFFSHORE TECHNOLOGY, LR**

Meeting to be held at

Lloyds Register, 71 Fenchurch Street, London, EC3M 4BS

At 17:45 for 18:15 hours (duration approximately 1 hour)

The tools that are becoming available to support assets in service are in some instances astonishing in what they can do. However, if we are not careful we lose sight of the "why" why do we do what we do and what is it we need to do. These are two very different sides of the same coin.

The presentation will look at what it is we need to do - and relate this back to tangible action on the asset and how we link this to the tools that are and are becoming available to these actions. After all experience has shown in the marine and offshore industries if the need is not demonstrable and linked to cost effective operation and safety then it is unlikely to achieve a major uptake.

In terms of the tools under discussion; software solutions, remote inspection and thoughts around how we choose to re-examine some of the goals we need to achieve will be covered.

The presentation will conclude with a look at issues around data management over the long term and some of the implications around this.
