## Flagships of the Future

Presented by

**Diane Gilpin**

SGSA is a collaborative UK based project developing Maritime Renewables for the global shipping fleet by combining 21st technologies transferred from yacht racing, renewables, F1, aerospace, automotive, novel materials with traditional naval architecture. SGSA has created a system solution that comprises FAST technology, TRADEWIND data analysis tools and RE:SURGE financial solutions. SGSA creates multiple revenue opportunities for investors to catalyse rapid uptake of Maritime Renewable energy technologies.

**Diane Gilpin** has more than 25 years' experience at the cutting edge of technology, innovation and systems design. She was on launch team for the UK's first cellphone system; worked with several F1 motor racing teams; managed a Formula Three racing team in the 1980s; for Citibank launched the first windows based financial information system in the newly deregulated City of London in the 1990s; managed offshore yacht racing teams – 'Logica' and 'Ecover' - in late 1990s/early 2000s. Pioneered renewable energy with the B9 Energy group from the early 2000s. Created and leads Smart Green Shipping Alliance.

Both members and non-members welcome.

Continued Professional Development	Certificate of Attendance at Technical Meeting by Branch Committee Member Name ..... Signed .....
