# The Royal Institution of Naval Architects

## International Conference on Marine Design
in association with
### Coventry University
#### 14 - 15 September 2011

#### First Notice & Call for Papers

The Royal Institution of
Naval Architects

in association with

**Coventry University**

supported by

**Coventry TRANSPORT MUSEUM**

and

## EBDIG

The first International Conference on Marine Design will provide a forum for the presentation and discussion on developments in design practice, covering the full spectrum of aesthetic design in the maritime industry, from small craft to superyachts to cruise ships. The conference will also look at the transfer of innovation and good practice from other industries

Papers are invited on the following aspects of design:

- Design visualisation (including design methodologies, design practice, innovative concepts, design analysis tools, computer aided design).
- Ergonomics and domotics (including user centred and emotional design methodologies).
- Sustainability in construction (including one-off construction and series production issues, facility design, materials, joining technologies).
- Sustainability in operation (including, equipment, results of sea trials, results of instrumentation.
- Implementation of regulations in the design process (including international, national, and regional regulatory frameworks, classification, codes of practice, rating rules).
- Virtual work/learning environments.

☐ I would like to offer a paper and attach a synopsis of no more than 250 words 18/03/2011

☐ I wish to receive details on exhibition space and sponsorship opportunities

☐ I would like to receive a full programme brochure and registration form
