PREVENTION OF AIR POLLUTION FROM SHIPS

Report on the analysis of impacts on global refining and CO₂ emissions of potential regulatory scenarios for international marine bunker fuel

Note by the Secretariat

SUMMARY

<i>Executive summary:</i>	This document provides a report commissioned by the Informal Cross Government/Industry Scientific Group of Experts
<i>Action to be taken:</i>	Paragraph 3
<i>Related documents:</i>	MEPC 57/4 and MEPC 57/INF.6

Background

1 The Informal Cross Government/Industry Scientific Group of Experts commissioned EnSys Energy & Systems, Inc. (the United States) to report on the analysis of impacts on global refining and CO₂ emissions of potential regulatory scenarios for international marine bunker fuel.

Summary and description

2 The report is summarized and described in document MEPC 57/4, paragraphs 87 to 106. For reasons of economy, the full report is not attached to this document but can be found in BLG 12/INF.11.

Action requested of the Committee

3 The Committee is invited to note the information provided and take action as appropriate.

For reasons of economy, this document is printed in a limited number. Delegates are kindly asked to bring their copies to meetings and not to request additional copies.
